

DATA MANAGEMENT, BUILT FOR AI AND HPC INFRASTRUCTURE

Move data fast. Archive at scale.

Miria helps organizations move, protect, and preserve massive amounts of unstructured data across heterogeneous storage environments — at petabyte scale, without vendor lock-in.

WHAT MIRIA DELIVERS

01 Move Data Fast

Migrate and synchronize data across heterogeneous storage platforms at petabyte scale.

02 Archive at Scale

Reduce storage costs and preserve data across file, object, tape, and cloud environments.

03 Protect Critical Data

Support backup, disaster recovery, and long-term resilience for critical datasets.

04 Freedom from Lock-In

Choose the storage technologies that best fit your business — never tied to a single vendor.

Unified data management across every storage tier

File • Object • Tape • Cloud

Move, protect, archive, and preserve data across heterogeneous storage environments — without vendor lock-in.

IDEAL FOR

• AI & HPC Infrastructure

• Research Data Management

• Storage Modernization

• Backup & Disaster Recovery

• Data Archiving & Preservation

• Multi-Vendor Storage Environments

Backup • Migration • Archive • Mobility
